**Product short description:**

BlueChart g3 coastal charts provide industry-leading coverage clarity and detail with integrated Garmin and Navionics data. Also included is Auto Guidance technology which uses your desired depth and overhead clearance to calculate routes and provide a suggested path to follow — overlaid onto your chart. NOAA raster cartography is also available as a free downloadable feature via the ActiveCaptain app. It gives your chartplotter paper chartlike views of NOAA-surveyed areas in which individual points of interest are labelled with corresponding longitude and latitude information. Worldwide coverage is available by regions as accessory cards or via download; each region is sold separately.

**Compatable with ECHOMAP™ Plus series chartplotters.**
