EAN13: 00753759120610
UPC: - MPN: 010-10580-10

Product short description:

Connect a thermal camera underwater lighting or boart stabilizing system to a compatible GPSMAP® series Garmin chartplotter with this PoE (Power over Ethernet) isolation coupler. The coupler provides connectivity to the Garmin Marine Network; without it the network will not function correctly and could possibly damage your Garmin unit and/or PoE device.
