UPC: - MPN: 010-11939-22

Product short description:

Step up to 1 kW without a fairing with this flush-mounted bronze housing that protrudes less than 1/4-inch outside the hull and can sit on the trailer rollers/bunks without damage. The tilted element inside the transducer accommodates all hull deadrises and eliminates the need for a fairing block. And low medium and high frequency versions provide maximum flexibility for the choice of frequencies.
