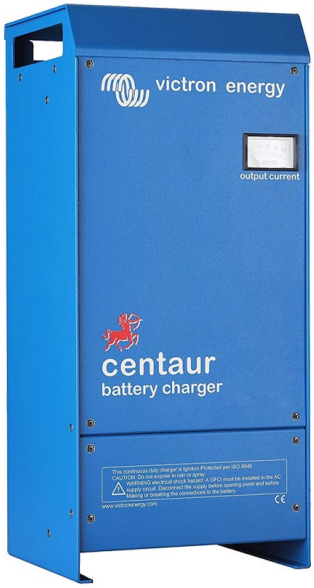
Victron Centaur Charger 24v/30a



Product price:

£687.60 tax included

Product codes:

Reference: 792-CCH024030000
EAN13: 08719076021551
UPC: - MPN: CCH024030000

Product short description:

Designed to meet the requirements of both CE for Europe and UL for the United States the Centaur model range features auto-ranging input covering 90-265VAC 50/60Hz input meaning they can be used anywhere in the world. Crucially and unlike other products that state universal input the Centaur range will maintain full output power within the entire specified range. The Centaur model will also work on 90-400VDC input making it a perfect Charging DC-DC Converter in a Diesel Electric system.
