Product short description:

Network compatible CHIRP SideVision sonar for aSeries cSeries and eSeries.

Image fish bait and bottom structure up to 183m horizontally per side.

Multi-sonar compatible: view CHIRP SideVision alongside other sources simultaneously.

CHIRP signal processing delivers amazingly detailed crystal-clear images.

Works seamlessly alongside Raymarine Digital CHIRP and CHIRP DownVision sonar.

Adjustable CPT-200 transducer (Included) optimises performance for shallow or deep water scanning.
