UPC: - MPN: 010-12928-01

Product short description:

This transducer is part of the Pantopix LiveScope system and requires the GLS 10 sonar black box to function. This thru-hull version transducer features LiveScope Forward to see detailed easy-to-interpret live scanning sonar images of structure bait and fish swimming up to 60 metres around the boat in real-time even when the boat is stationary. Attitude Heading Reference System (AHRS) stabilisation keeps the sonar view steady even in rough conditions.
