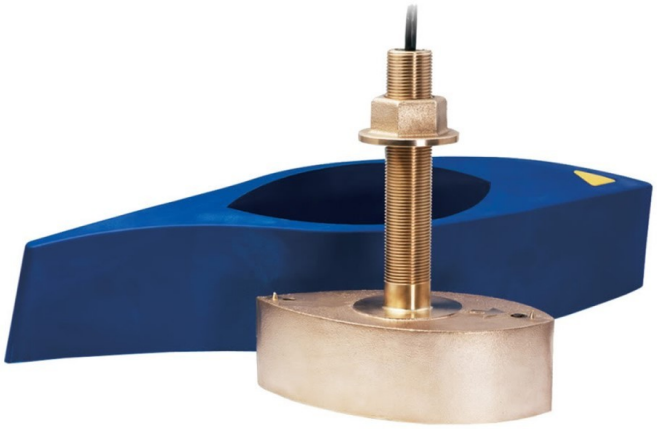
Raymarine B275LH-W Wide Beam Thru Hull Transducer



Product price:

£2,600.00 tax included

Product codes:

Reference: 705-A80322
EAN13: 00723193796283
UPC: - MPN: A80322

Product short description:

This wide beam transducer features a constant 25 degree beam angle for the entire High CHIRP spectrum. The result is improved shallow water coverage while maintaining the high resolution capabilities associated with the High CHIRP channel. Available in a variety of configurations there is a wide beam transducer solution for almost any vessel.
