Product short description:

Hempel's Tiger Xxtra 71000 is a conventional antifouling (insoluble matrix) with a high content of cuprous oxide. It changes to its final colour after approximately 1 week of exposure to water.

Suitable for both power & sail boats & just one coat can last the season. Applying a second coat for year round protection gives excellent & consistent long term performance, under all conditions.

- Suitable for use on all substrates except aluminium
- Thinners: No.3
- Coverage: 12.8m²/Ltr
