Digital Yacht iAISTX Class B Wireless Transponder

Product price:

£660.00 tax included

Product codes:

Reference: 144-IAISTX
EAN13: 00703791696123
UPC: - MPN: ZDIGIAISTX

Product short description:

iAISTX creates a secure password protected local Wi-Fi network which allows AIS and GPS data to be sent to popular iOS and Android apps such as Navionics iSailor Weather4D SailGrib iNavX TimeZero and more. These apps offer a detailed overlay of local AIS targets all updated in real-time. Depending upon the app you can click on a target and can see identity as well as collision avoidance data. This includes CPA (closest point of approach) and TCPA (time to closest point of approach).
