Raymarine Type 1 Autopilot Hydraulic Reversing Pump - 1L / 24VDC

Product price:

£1,175.00 tax included

Product codes:

Reference: 705-M81119
EAN13: 00023193811192
UPC: - MPN: M81119

Product short description:

Raymarine Evolution pilots connect to hydraulic steering systems using a rugged hydraulic pump matched to the capacity of the hydraulic steering system.

If your system is hydraulic...

You'll need to find out the size (in cc) of the hydraulic cylinder ram(s) mounted to the rudder or inboard engined boats or to the drive unit on outboard engined boats. Your steering system documentation will have this information.

Autopilot Tip

If you cannot find the ram size on your steering system documentation you can look on the cylinder ram itself for the brand and model

number. Once you have the number use our hydraulic cylinder ram cross-reference guide to determine which hydraulic autopilot pump is compatible with your vessel's hydraulic steering system.
