UPC: - MPN: M81130

Product short description:

Raymarine Mechanical Linear Drives.

Our most commonly used drive types for sailing vessels. Raymarine mechanical linear drives provide powerful thrust fast hard-over times and quiet operation. Mounted below decks the linear drive moves the rudder directly by pushing the tiller arm or a rudder quadrant.

A linear drive unit connects to the rudder stock via an independent tiller arm. Accessory fittings from your steering manufacturer may be required. Must be able to back-drive steering system from the rudder.
