UPC: - MPN: A80510

Product short description:

FLIR’s JCU-3 Joystick Controller works with select Thermal Camera Systems to allow full access to the camera’s pan tilt zoom and menu settings. The JCU-3 features 9 buttons plus a rotary controller and joystick trackpad in a compact housing the fits just about anywhere. The JCU-3 can be mounted either horizontally or vertically using either of the 2 supplied key faces. The JCU-3 is rugged and waterproof for mounting in the pilothouse or on-deck. It can be surface or flush mounted to your helm console or bulkhead. Multiple JCU-3 controllers can be installed to allow control of a single camera from several different locations onboard. The JCU-3’s keypad and rotary knob are backlit for easy viewing at night. The JCU-3 can bepowered over Ethernet from the vessel’s onboard network or connected directly to a 12V DC power source and interfaced to the camera with an Ethernet connection.
