Product short description:

Skylla-i (1+1): two isolated outputs to charge 2 battery banks. The second output limited to approximately 4 A and with a slightly lower output voltage is intended to top up a starter battery.

Rugged - Aluminium epoxy powder coated cases with drip shield and stainless steel fixings withstand the rigors of an adverse environment: heat humidity and salt air. Circuit boards are protected with an acrylic coating for maximum corrosion resistance. Temperature sensors ensure that power components will always operate within specified limits if needed by automatic reduction of output current under extreme environmental conditions.
