UPC: - MPN: 010-02365-02

Product short description:

Get a sharper view from a connected helm with the GPSMAP 723 chartplotter. Its higher-resolution 7” display has 60% more pixels than previous-generation touchscreens. And with its compact footprint vivid sonar colour palette and nearly double the processing power of previous-generation GPSMAP devices it seamlessly integrates into your Garmin marine system. The GPSMAP 723xsv also features built-in Ultra High-Definition SideVü and ClearVü scanning sonars and supports 1 kW CHIRP traditional sonar as well as fully networkable radar Panoptix LiveScope sonar and Auto Guidance technology.
