UPC: - MPN: TZ DFF3D

Product short description:

Add on Software Module for TimeZero Navigator Professional. By adding the optional DFF3D Module together with the PBG Module to your TZ Professional software you can connect this Furuno Multi-Beam Sonar to your computer and unlock powerful integration features. The DFF3D Sonar is the first entry level Multi-Beam Sonar able to reliably create PBG up to 200 meters. This data is sent directly to TZ Professional and used to create a highly-detailed PBG map faster than ever before.

Note: Requires a PC with TimeZero Navigator Professional Software
