UPC: - MPN: LD720

Product short description:

The Oxford Commuter X4 is a revolution in wearable lighting. Its unique design means the user can be seen clearly from various viewing angles whilst the distinctive fibre optic straps also improve spacial awareness; helping other road users judge your speed and distance more accurately. The Commuter X4 is a wearable fibre optic rear light suitable for everyone. It can be worn on most backpacks up to 35 litres with rain covers or directly over your shoulders. It also doesn't restrict backpack access while fitted. The distinct shape with multiple focus points helps road users judge your distance width and speed. The fibre optics create a side profile at junctions and help HGV drivers see you more clearly from above. The central projective light provides 30 or 70 lumens with multiple flash and fade settings.

Powerful central light with unique fibre optic strap system.

70 lumen light output.

IP65 Water resistant.

Convenient charging via USB - 3.5 - 20hrs run time.

Suitable for a variety of uses.
