Product short description:

Highly accurate position fixing GPS navigator with clear colour LCD.

The FURUNO GPS navigator GP-39 provides accurate and reliable position fixing thanks to a 12-channel GPS receiver combined with integrated SBAS (WAAS/EGNOS/MSAS) technology. The GP-39 has various display modes (Plotter Highway Steering NAV data Satellite monitor and 2 user customizable modes) on the 4.2\" colour LCD. Up to 3 000 points of ship track 10 000 waypoints and 100 routes (each with up to 30 waypoints) can be stored. The waypoint and route data can be exported/imported via a USB flash drive or signal converter.

The GP-39 can be networked with a fish finder sonar radar or other navigation equipment for feeding highly accurate navigation data.
