UPC: - MPN: 010-12017-30

Product short description:

Built to take advantage of the GLONASS system/constellation of satellites as well as standard GPS this robust external antenna is packaged in a low-profile water resistant housing and provides 3 easy mounting solutions: pole surface or under-deck (for the underside of fibreglass decks). External GPS/GLONASS antennas provide increased flexibility and installation options as well as the potential for enhanced reception of GPS/GLONASS signal for those products with built-in GPS/GLONASS antennas.
