Product short description:

The EngineBox expands the possibilities of the NavBox for multi-engine applications or can be used as stand-alone when navigation information is not required. The EngineBox has a NMEA2000® and a J1939 CAN port. The EngineBox can also be used on older completely analogue engines thanks to the analogue input ports provided and designed for: RPM data 0-400 Ohm sensors and 4-20mA sensors.
