UPC: - MPN: A2K-TER-U

Product short description:

The world’s first intelligent universal in-line terminator. Terminate your NMEA 2000 network – regardless whether a male or female connection is required – and use the TER-U’s smart functionality to easily troubleshoot any power or voltage issues on your NMEA 2000 bus.

The TER-U can be fitted directly at the end of your network or used as an in-line terminator in difficult to access locations.
