UPC: - MPN: T70424

Product short description:

The NEW Raymarine Ray90 Modular Dual-Station VHF Radio System brings multi station communications to a whole new level of power performance and flexibility. The Ray90 is a black-box design with a transceiver that hides out of sight while the ergonomic RayMic handset and remote speaker provide full control of the radio with crystal clear audio. The Ray90 is equipped with a powerful 25-watt transmitter and commercial grade electronics for long life and superior performance. Channel scanning dual-watch tri-watch and weather alert are standard.

Class D Digital Selective Calling radio and integrated GPS makes setting up the advanced safety and calling features easy. Simply input your vessel’s MMSI number during setup and you’re ready to go. For GPS operation the optional GA150 passive GPS antenna is

required. Use Ray90’s position tracking feature to keep tabs on up to 5 nearby DSC equipped vessels. Their positions are automatically shared with your Raymarine MFD. Keep an eye on other boats in your cruising party monitor vessels of interest or manage your local fleet. In Europe the Ray90 supports the ATIS system on navigable inland waterways.
