Product short description:

Airmar 31-578-1-01 B60 600W 50/200 Transducer With Connector For Lowarance and Simrad Sounders

12' Tilted version for 8' to 15' hull deadrise
Compatible with All Lowrance units with blue connector includingx LCX HDS & Broadband units. Simrad BSM-1 Sounder boxfor NSE-8 NSE-12 and GB40.

The B60 is a 600 W 50/200 kHz transducer which integrates Airmar’s popular tilted element feature. Tilted element transducers have the ceramic element fixed at either a 20° or 12° angle within the transducer housing. The transducer is installed almost flush to the hull and the tilted element corrects for the hull deadrise by orienting the beam directly down. This assures maximum echo returns to the transducer and more accurate depth readings.
