Product short description:

Airmar D00218H Inline 6 Conductor IP67 Cable Splice

This IP67 rated waterproof connector finally makes secure in-line cable splicing as easy as stripping cable and turning a screw.

The integrated cable gland provides strain relief and ensures a watertight connection. Its solderless screw terminal connections allow field servicing of the splice without cutting or soldering. Ideal for use in exposed exterior or hostile environments such as engine rooms bilge or sailboat mast applications.
