Product short description:

Airmar 41-498-1-01 SS164 50/200 1KW Transducer with Humminbird 9 pin connector

0' version for 0' - 7' hull deadrise

Step up to a 1 kW—without a fairing! Airmar’s innovative Tilted Element™ technology to a higher power. The 1 kW flush-mount tilted element transducer is perfect for fast trailered tournament sportfishing vessels that cannot accomodate a high-performance fairing. The flush-mounted stainless steel housing protrudes less than 6.35 mm (0.25\") outside your hull and can sit on trailer rollers and bunks. The ceramic arrays are tilted inside the housing providing the perfect vertical beam with maximum energy on what is directly below the boat.
