Airmar TM265LH DT XID 12M Cable NC

Product price:

£2,338.00 tax included

Product codes:

Reference: 032-41445102
EAN13: 801769005080
UPC: - MPN: 41-445-1-02

Product short description:

Airmar 41-445-1-02 TM265LH 1KW Transom Mount Transducer with Bare ends Cable

We know that specific frequencies excel at detecting certain species of fish: Bluefin Tuna—60 kHz Squid—133 kHz and Cod—175 kHz. The TM265LH transducer includes all these frequencies plus every other frequency in the high and low bandwidth.

This powerhouse transducer delivers excellent resolution bottom discrimination and bait and game fish separation at all depths. The TM265LH is packed with a seven-element low-frequency array that operates between 42 kHz and 65 kHz for excellent deep water performance.

The high-frequency ceramic operates between 130 kHz and 210 kHz with a narrow (10° to 6°) perfect for pick apart structure and pinpointing tight holding fish in structure.
