UPC: - MPN: 41-433-2-03

Product short description:

Airmar’s B265LH is packed with a seven-element low-frequency array that operates between 42 and 65 kHz for excellent deep-water performance. The high-frequency ceramic operates between 130 and 210 kHz with a narrow 10° to 6° beam—perfect for picking apart structure and pinpointing tight-holding fish in structure.
