Furuno Airmar CM265LH Chirp Cavity Mount Chirp Transducer

Product price:

£1,980.00 tax included

Product codes:

Reference: 260-41-469-1-02
EAN13: -
UPC: - MPN: 41-469-1-02

Product short description:

Inside the CM265LH is a seven-element low-frequency array that operates between 42 and 65 kHz for excellent deep-water performance. The high-frequency ceramic operates between 130 and 210 kHz with a narrow 10° to 6° beam width - perfect for picking apart structure and pinpointing tight-holding fish in structure.
