UPC: - MPN: 010-11937-22

Product short description:

Step up to 1 kW without a fairing with this flush-mounted bronze housing that protrudes less than 1/4-inch outside the hull and can sit on the trailer rollers/bunks without damage. The tilted element inside the transducer accommodates all hull deadrises and eliminates the need for a fairing block. And low medium and high frequency versions provide maximum flexibility for the choice of frequencies. An excellent choice for fiberglass and wood hulls this 8-pin transducer has a depth of 1 200 ft; an operating frequency of 130-210 kHz; a beamwidth of 9-15 degrees; and a 16 to 24 degree deadrise. Transducer kit comes with installation instructions. Follow the instructions carefully to avoid damaging your boat.
