Product codes:

Reference: 230-0101210610
EAN13: 00753759114992
UPC: - MPN: 010-12106-10

Product short description:

Easily attach your compatible 4- 8- or 12-pin scanning transducer to the jack plate of your boat with this mount which provides excellent sonar returns at low speeds. The mount protects the transducer from underwater obstructions and creates no drag on the boat — all while allowing angle adjustment of the transducer so it is parallel with the water surface. And since the transducer is out of the water sonar will not track bottom when the boat is on plane.
