Product price:

£2,495.00 tax included

Product codes:

Reference: 705-T70543
EAN13: 00723193842324
UPC: - MPN: T70543

Product short description:

RVM-400 series stainless steel all-in-one through hull transducer brings the power and clarity of RealVision MAX technology to inboard and outboard powerboats. The RVM-400 series transducers are compatible with the RVM1600 sonar module and Axiom 2 Pro RVM chartplotters.

The RVM-412 is a port and starboard transducer pair designed for boats with 5° to 15° of deadrise. Each transducer element is tilted at 12° to compensate for the hull deadrise.
