Product short description:

Hempel Primer Undercoat 13201 is a quick drying, urethane-modified primer with zinc phosphate pigments for use as a general purpose primer for alkyd systems on well cleaned interior and exterior wood or steel surfaces.

Can be used as a single component primer for all substrates (including steel) above the waterline, and an undercoat for Brilliant Gloss/Multicoat/Non slip Deck Coating. A quick-drying, high-opacity primer and undercoat, that gives excellent durability and surface stability ready for overcoating with single component topcoats.
